Left column

C-M is located on the Court (Cor means ring) Stewards Lands. Æthelred I ca. 865 AD had his Aula "hall" and Bower to the east, Chapel (freehold ca 1170, 30a.) at the south west, with his CURIA of 12 Britons as the House of CERDIC heartlands that included Windsor Castle overseeing London till ca.950 AD.

Here until ca 1215 the Hundred Court, of which the Court Borough, Court Baron "manerium", Tithing Court Leet and St Mary's Abbey Court, so assembled, this capital reaching to the centre of Cranborne and Covenbury field.

MUSICA UNIVERSALIS – geodetic

The Geodetic Inch as 0.1718 Minutes of Arc has the Harmonic of 4320 minutes of arc from the Earth centre to the average height of the Atmosphere so creating the Fundamental quality Note in Music 432 Hz.

MOON radius is 2,100,000 MY

1 Drusic Foot = $\frac{1}{19,200,000}$ Polar radius of the Earth

Polar axis of PLANET EARTH 2^{12} x 3 x 5^4 [2, 3, 5 PN roots of music] = **7,680,000 MY**
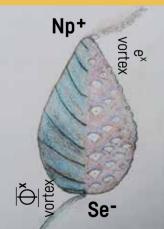

EARTH mean Radius 12^6 x 7 = **20,901,880 MF**

EARTH circumference $\frac{12^5}{10}$ = **24,883.2 ancient MILES**

Equatorial circumference of the PLANET where 2^3 x 3^2 x 5 = 360° of a circle gives **365.24 x 360,000 British Feet**

Avebury's location is at 360°/7 latitude as one point of the 7 Star inside Earth, pushing out at our Planet's surface (ditto S-H latitude – 15 mins of a degree). A 7 pointed STAR structures the S-H Aubrey Holes to the Sarsen Circle, where this circle is 360°/7 latitide also.

S-H orientation of this star is the midsummer azimuth of sunrise at 1/7 of a circle (approx.).

Celts were the first to put metal (bronze) blades and moldboards on wooden ploughs; inventing the first wheeled harvester.

Tables (center-right)

Solar Year	365.24 days
Lunar Year	(354.36) days
	10.88 days
where normal year is	12 + 0.368
	365.24 =	12 + 1/E
Eclipse days	18.62
	12 – (1-1/e)
are	346.62 days
Luni-Solar rhythms:-	$\frac{e}{1/e}$ = e^2
29.57/10.88	MY/MF

Metonic cycle of Moon "19 yrs" 18 years + 11.33 days total: 6585.78 days ÷ 19 = 346.62 days

where side-real month $4 - \pi / \pi$ = 0.2732 x scale factor 100 = 27.32 days
Human gestation harmonics

1 / 365.24 = 00273 days	Newborns are 100% crystal "6 sided" water

In this new ORB this halving $1/2^n$ or doubling 2^n is coupled with magnetic spin in mixtures at half the linear distance as order from Energy lines of magnetic Plasma.

Newtonian PHIsics:
EARTH speed x 81 = MOON speed
EARTH mass = MOON mass / 81

$19+1 = \frac{1(00)}{81} = \frac{1(0)}{3^4} = 3x10^4$
Matter / Light

stable elements of MATTER Contraction of electric charge with centripetal force of gravity

C-M Globe $1/2^{17}$ x 12735 km Planet Earth Diameter = 97.16 metres Ξ 104.27 MY
This diameter the same as Stonehenge "S-H" Aubrey Hole diameter @ $1/2^{17}$ of Earth where 1 MY = E x 1 BF

Right column

Edmondsham, with Bronze Age lynchet fields and covin-barrow dwelling sites to the south, was held by Borough Socage in service to the Steward Court, this ancient DODA office land in geodetic measure 12 Hydes of 120 acres totalling 1440 Acres.

Latterly this service behind the State Sword of Mercy as Premier Norman Feudal Baron for the Keeper of the British Realm as the Honor of Gloucester.

MUSICA UNIVERSALIS E-M

The electro-magnetic spectrum converts as metres or hertz because 1 metre ≈ 1 / acceleration of light or gravity
ε = 2.718 1/e = 0.368 Eulers Number
Φ = 1.618 1/φ = 0.618 PHI
Π = 3.141 PI

Expansion E + Contraction ⊕ of Universe $E^2 + \Phi^2 = 10$ for Plane Curve Geometry of the Orb is

$$\frac{2}{\sqrt{\Phi}} = \frac{\pi}{2}$$

with Eulers Identity:
$E^{4\pi i} = (-1)^4$ in polar coordinates in spin turns i to -1 every 90°, + 1 to -1 every 180°

E or e is integral to the Prime Number "PN" Cross of 24 - atoms, 12 – E-M spectrum, of 6 for Biology & Chemistry all at the PN rhythm of 6, so generating the Harmonics of the Universe eg snowflake:-

For PNs above 11 (-1 plus 12) all PN pairs divide by 12 and the occurrence of PNs is in the frequency of E where PNs increase or decrease by X / natural log base e of X
Φ = 7 – √2 – √3 – √5 where 2, 3, 5 are the PN roots of MUSIC where frequencies in Hertz always have their sum of digits divisible by 9, where phi determines the pentagram star as life's bioelectricity, where then MUSIC connects Earthly Life to the Heavens.

+1 e STAR of 7 vortex e^x every 180° Proton+
6n	0 STAR of 6 vortex 1/x as balance between dimensions Neutron0
- 1ø STAR of 5 vortex $ø^x$ every 90° Electron-

For a sphere the diameter is the E-M resonant frequency where the core of this Orb is on the surface $4\pi r^3$.

The Harmonic of 6 scale factor 10 for any ORB perfectly divides the sphere or circle into 6 by the Radius (half the E-M resonance) where the hex-parallel sides contain the frequency as the Standing Wave eg Singing Quartz; forming a sphere or circle at the centre exactly in half creating the Octave resonance.
